

## Abstract Template and Guidelines

|                                 |  |   |
|---------------------------------|--|---|
| <b>Title</b>                    |  | Concise yet descriptive and eye-catching statement that highlights the content of your work                   |
| <b>Background and Objective</b> | <b>Introduce the topic</b>             | Set the context for your study and present the main question/goal of your work                                |
|                                 | <b>Discuss the existing literature</b> | Introduce previous research that has been done in the field   |
|                                 | <b>Rationale</b>                       | Highlight the limitations/gaps in the current literature and the value of answering your research question    |
|                                 | <b>Aim and Objectives</b>              | Present the purpose of the study and the explicit goals   |
| <b>Methods</b>                  |  | Briefly explain the methods and data used in the study as well as any analytical tools and techniques applied |
| <b>Results</b>                  |  | Highlight the major findings of your study that answer your research question                                 |
| <b>Conclusions</b>              | <b>Summary of results</b>              | Interpret the results and outline the broad conclusions   |
|                                 | <b>Significance</b>                    | Emphasize the implication of your findings and its contribution to the research area                          |
